Grants

NTIA administers grant programs that further the deployment and use of broadband and other technologies in America, laying the groundwork for sustainable economic growth; improved education, public safety, and health care; and the advancement of other national priorities.

**Infrastructure Investment and Jobs Act Overview**

On November 15, 2021, President Biden signed the *Infrastructure Investment and Jobs Act* into law. This Act includes a significant investment of $65 billion to help close the digital divide and ensure that all Americans have access to reliable, high speed, and affordable broadband. This investment builds upon the funding for broadband deployment provided in the American Rescue Plan, the Consolidated Appropriations Act, 2021, the FCC’s Universal Service program, and USDA’s Rural Utilities Service broadband programs. This historic investment will lay critical groundwork for widespread access and affordability of broadband, creating new jobs and economic opportunities, providing increased access to healthcare services, enriching educational experiences of students, and improving overall quality of life for all Americans.

EBB is now ACP!
ACPBenefit.org

• NEWSFLASH: the FCC's EBB Emergency Broadband Benefit is now ACP: the Affordable Connectivity Program.

• This continues an FCC benefit program that helps ensure that households can afford the broadband they need for work, school, healthcare and more. The benefit provides a discount of up to $30 per month toward internet service for eligible households and up to $75 per month for households on qualifying Tribal lands. Eligible households can also receive a one-time discount of up to $100 to purchase a laptop, desktop computer, or tablet from participating providers if they contribute more than $10 and less than $50 toward the purchase price.

• The Affordable Connectivity Program is limited to one monthly service discount and one device discount per household.

Top 10 Grant Writing Tips

• Start early
• Reach out to PO to verify fit
• Read review/scoring criteria & tailor grant to them
• Many require matching funds – get commitments & budget appropriately
• Clearly assess, document & summarize need/rationale/population served
• Have clear work plan with deliverables & timeline
• Metrics, benchmarks & criteria for success
• Collaborate – stakeholders, patients, industry, TRCs etc. – letters support
• Experience, skills, capabilities
• Have others read (critically) proposal

ATA Technology SIG/Special Interest Group

The ATA Technology SIG (Special Interest Group) is the technology "center of excellence" and focuses on technologies which enable meaningful practice and outcomes for providers and patients in the prevention, diagnosis, and treatment of disease. The SIG explores telemedicine technologies and how they should be used by providers and patients in the practice of telemedicine including prevention, diagnosis, treatment, and education for both clinical and educational applications - telemedicine and telehealth. The scope of this SIG would include those technologies and practices where there is no prevention, diagnosis, or treatment of disease.

The Emergency Broadband Benefit (EBB) is a temporary discount on monthly internet bills for qualifying low-income households.

- **Up to $50 per month** for broadband services purchased by eligible households and up to **$75 per month** for households located on Tribal lands.
- A **one-time discount of $100** for the purchase of a desktop, laptop, or tablet computer from participating providers.

Applications are now available. Only one monthly service discount and one device discount is allowed per household.
Connect Arizona Digital Navigators are available to answer your EBB questions and help you thrive online. Make an appointment, or give us a text or call at 602-529-1519. We’re available Monday – Friday from 9am to 6pm PST.

USAC’s Emergency Broadband Benefit support hotline, (833) 511-0311, is open from 6am to 6pm PST, seven days a week. You can also email EBBHelp@USAC.org with program questions.
Telemedicine and Libraries

Why Telehealth in libraries?

According to the American Library Association, people turn to and depend on libraries and librarians for help in times of economic hardship. Libraries are now safe havens for people in need, including the homeless, mentally ill, immigrants, abuse victims and the impoverished. Many libraries have services for these visitors such as congregation areas for programs and resources, but now for the first time in history, some libraries also offer healthcare services.

1. Libraries are trusted places
2. Have highly qualified staff
3. Have the technology needed
4. Have broadband connectivity
5. Libraries always involved in narrowing the digital divide

Sullivan County Announces Partnership
With New Mobile Health Unit

*NYS Attorney General Letitia James Praises Launch of Service*

Monticello, NY – NYS Attorney General Letitia James joined Sullivan County officials today to inaugurate Bridge Back to Life Center’s new mobile health unit, which will be used to bring sorely needed medical and substance use services to communities across the County.

“The opening of the Bridge Back to Life Center’s mobile treatment unit starts a new chapter of healing for Sullivan County,” said James. “After years of devastation by the opioid crisis, we are finally holding pharmaceutical companies accountable for the destruction they caused, so far bringing up to $1.5 billion that will go directly into communities for treatment, prevention, and education services just like this one. Our work to uplift communities weighed down by this crisis is far from done, but today we begin the healing process for so many families.”
The 32-foot-long mobile health unit is privately operated but will be utilized by Sullivan County’s Department of Community Services and a host of other local agencies.

$1M grant sets up Renown Regional for hybrid telehealth and in-person care

The FCC funds greatly expanded the health system’s virtual care abilities last year as COVID-19 hit – but the added bonus of a hybrid care future is a big win.

CO Telehealth Alliance

OeHI’s Telehealth and Broadband Initiative develops and supports approaches that lead to increased adoption of telehealth, and reliable and affordable broadband access for health organizations and consumers. Telehealth and broadband are key priorities of the Primavera and Hols administration. Colorado has already made significant progress in providing remote access to care through telemedicine.

Telehealth is an important avenue to support health care reform and is increasingly seen as an acceptable alternative to many types of in-person provider visits. One of OeHI’s Vitality Important Goals, or VIGs, for this year is to increase utilization of telebehavioral health in safety net providers. OeHI is also working to support expansion of telehealth policies and practices based on cost savings, economic impact, and health outcomes.

In Colorado’s rural areas, only 7 to 10 people have access to broadband. OeHI’s goal, in partnership with other state agencies, is to raise rural broadband availability and pave the path to achieve 100 percent access for all of Colorado. Lack of broadband inhibits the utilization of telehealth services in many parts of rural Colorado as well as the uptake of other emerging health IT capabilities. OeHI is working with the state to expand usage of telemedicine and broadband access in order to make health care across the state more affordable and accessible for all.
HCW  https://hcwhosted.org

HCW HOSTED is a Tucson-based 501(c)(3) nonprofit dedicated to facilitating community support of healthcare workers and their families during the COVID-19 pandemic and beyond.

Because we can only be as healthy as the healthcare workforce that cares for us.
